ENVIRONMENTAL POLICY

INDIPCO is firmly committed to continually improve the environment and prevent pollutions from our operations by effectively implementing and monitoring ISO 14001:2004 Standard.

- Comply with all applicable local and international legal and other requirements.
- Implementing and maintaining 3 R mechanisms (Reduce, Reuse Recycle) in our operation.
- Providing information, instructions, training and supervision as necessary to all employees, visitors and contractors at work to ensure proper implementations of environmental management system.
- Make available copy of environmental policy to employees, visitors, contractors, other entrusted parties and public.
- This policy will be reviewed for continual suitability of operation and legal regulations, changes and/or needs of organization

This is accomplished through the application of innovative techniques with a motivated workforce, working towards continual improvement in every functional area, by implementing and reviewing an outstanding environmental management system as per ISO 14001:2004.
